

# Steven Hanna

985 Clifton Ave, Glen Ellyn, IL, 60137

☎ +630.880.0793 • ✉ [stevenhanna@gmail.com](mailto:stevenhanna@gmail.com)

🌐 <https://stevenhanna.github.io>

Second year Computer Science student. Passionate about computing, design, development. Strong interpersonal skills for working in a team and successfully completing a project.

## Education

---

- Academic Qualifications.....
- **Syracuse University College of Engineering and Computer Science** **Syracuse, NY**  
*Computer Science, Renee Crown Honors* *2015 – current*  
GPA: 3.44 / 4.0  
Deans List - Fall 2015, Spring 2016
  - **Glenbard West High School** **Glen Ellyn, IL**  
*Honors / AP Curriculum, 4.8 / 5.0 GPA* *2011 – 2015*

- Relevant Coursework.....
- **Data Structures:** Abstract Data Structures, Algorithm Analysis, Object-Oriented Programming in Java
  - **Intro. Computer Science:** Programming Emphasizing Recursion, Data Structures, and Data Abstraction
  - **Intro. Object Oriented Design:** Fundamental software design concepts of functional decomposition and object-oriented design in C++
  - **Software Specification and Design:** Software requirements analysis, development of specification, and specification documents. (*current*)
  - **Computational Physics:** C course on modeling Physics related problems. (*current*)

## Technical and Personal skills

---

- **Programming Languages:** Proficient in: TeX, Java, JavaScript, HTML, Node.js, Git, CSS  
Also basic ability with: C++, Python, Bash, Android Development

## Previous Employment

---

- **Freelance Webdesign / Development** **Chicago, IL**  
*Design and Development* *March 2014 – Current*  
Created and maintained several websites, including personal blogs with a full integrated backends, and well as beautiful personal portfolio sites.
- **Hilltopper Track** **Glen Ellyn, IL**  
*Lead Designer and Frontend Developer* *July 2014 – February 2015*  
Designed, created, and implemented a custom backend and frontend for the Glenbard West Track and Field team, with advanced posting mechanisms. <http://toppertrack.info/>

## Notable Projects

---

- **Ritmico:** 'Redefining how music teachers and students communicate' <https://ritmico.xyz>  
Ritmico is a system that aims to increase communication between music students and teachers by providing an online commonplace to exchange messages, record practice times, and edit lesson notes. All server-side logic is written using the MVC framework *Sails.js*, on top of the *Node.js* stack. Entire front-end is written in EJS / HTML, CSS, and JavaScript, with the design implementing Bootstrap.
- **Proton** 'A streamlined Markdown Editor' <http://stevenhanna.github.io/proton/>  
Designed and implemented a Markdown Editor that can render and export Markdown as HTML, or as a PDF. Built on top of the Electron framework.
- **Argot** 'Constantly updated documentation' <http://github.com/stevenhanna/argot/>  
Argot parses comments inside source code turning it into simple Markdown, leaving your documentation always up to date and ready for the web.
